

Year 5 – Ethical fashion

During work week Year 5 focused on creating ethical fashion companies. We named our companies and assigned each person in our group with a different role. During group work, different people lead different tasks. The finance managed led the task of adding up all the costs and working out the profit. The events coordinator lead the task of organising the fashion show. The designer thought up the ideas for a fashion item. We work collaboratively to create a fashion item made out of recycled materials. We organised a fashion show to present our items to a team of experts. There were awards for the best design, best investment and best fashion show.

We learned about all the skills you need to work in a team and create a buisness. We were able to put these skills into practice and have now learnt a lot moreabout running a buisness.
