

Year 6
ENTERPRISE

During work week Year 6 focussed on using a variety of skills to create their own inventions before pitching their ideas to 'dragon' investors – top lawyers at CMS. The week involved designing, budgeting and marketing inventions developed in groups throughout the week before presenting their ideas to the 'dragons' in their central London office.

On our trip we went to CMS law firm to present our inventions to try and obtain an investment from the top dragons. Inventions that we developed included shoes that helped to protect people by releasing a poisonous gas, climbing shoes which recognised the surface you are on and clothes which grow as children get bigger (using elastic and special nylon). The dragos were incredibly impressed and year 6 did so well to present their ideas in such a high pressured environment.
